VOLUMETRIC
LIGHTING
MEETS LED
TECHNOLOGY

 **LITHONIA LIGHTING®**

THE NEXT GENERATION IN CONTEMPORARY DOWNLIGHTING IS HERE

The **RT5D LED** from Lithonia Lighting represents the next generation in contemporary downlighting. Combining the style and performance of RT5™ volumetric lighting with LED technology, the RT5D LED provides the market's largest LED lumen package in a distinctively appealing downlight.

ENHANCE YOUR ENVIRONMENT

The RT5D LED downlight features volumetric lighting, filling the entire volume of space with just the right amount of light.

The even distribution of light creates a more comfortable environment by making your space feel brighter without the glare or cave effect of traditional downlights. This makes the RT5D LED an ideal solution for corridors, lobbies, conference rooms and private offices.

RT5 fixtures improve the aesthetics of any room by creating an unprecedented combination of volumetric lighting and a quiet ceiling. The subtle shape and sleek, textured lines of the fixture complete the package—truly enhancing the environment.

The RT5D LED offers worry-free maintenance, sleek aesthetics, energy efficiency and environmentally friendly technology in one simple package.

ENERGY EFFICIENT & ENVIRONMENTALLY FRIENDLY

RT5D LED lighting is safe, environmentally friendly and contains no mercury. LEDs operate on less energy than standard downlights.

With its 50,000-hour life, the RT5D LED fixture lasts 5x longer than compact fluorescent and 50x longer than incandescent.

RT5D LED technology offers:

- 1,700 delivered lumens (equal to 42-watt CFL)
- Greater energy efficiency (20% more efficient than two 26-watt CFLs)
- Less landfill waste
- Reduced maintenance costs
- Lightweight materials and easy installation

Save even more on energy with step dimming capability through SIMPLY5™ Lighting Intelligence.

Patent-pending, thermal-dynamic control ensures cool running LEDs. Fixture height of less than 5" allows installation in shallow plenum applications.
