

 **LITHONIA LIGHTING®**

 **REALITY**  
LED DOWNLIGHT

the opportunities are endless...  
now make them

**REALITY.**

## REALITY

re-al-i-ty [ree-al-i-tee]  
– noun

The quality or state  
of being actual or true.

Lithonia Lighting continually challenges the lighting world as we know it. Our engineers are relentless in their efforts to improve upon existing technology to give you everything you desire —

- ① a better lighting experience,
- ② a thoughtful design and
- ③ an economical solution.

The REALITY LED downlight is the point at which provocative thought, innovation and realism collide.

*Some really smart geeks came up with something pretty cool.*

## perfect for relight and new construction opportunities

The US Department of Energy (DOE) estimates there are 500 million existing recessed incandescent housings installed in the United States with an additional 20 million installed annually. This creates a huge opportunity for retrofit and new construction projects in a variety of applications.

Sold with a housing or as a module, the **REALITY 6" LED** downlight is the perfect solution for many applications.

## easy to install

→ *Look, even our marketing guy can do it!*

finally, a downlight  
that delivers the  
promise of LED.  
**REALITY IS...**

matte white

clear diffuse

black specular

oil-rubbed bronze

brushed nickel

wheat diffuse

## 1 A BETTER LIGHTING EXPERIENCE

*It's like finally dating a ten  
when you've always settled for fives.*

- 3000K/85 CRI LEDs provide the warmth and color of PAR halogen lamps.
- Unique collimating lens and compound reflectors deliver 600 lumens precisely where you need the light.
- Clear lens masks the LEDs providing a clean, subtle look at the ceiling.
- Several reflector finishes are available to complement any decor.

## 2 A THOUGHTFUL DESIGN

*It's the lazy man's dream.*

- Fits in most popular 6" IC and Non-IC housings.
- Dimming standard with incandescent dimmers.
- Rated for 50,000 hours in Non-IC applications and 35,000 hours in IC applications; never change a bulb again.
- Wet location listed standard.

## 3 AN ECONOMICAL SOLUTION

*Penny pinchers and tree huggers rejoice!*

- Uses 80% LESS energy than a standard 65W BR30 lamp.
- Contains no mercury and is made from recyclable materials.
- Extremely affordable.
- Virtually maintenance-free.

WITH MORE THAN 60 YEARS experience in developing high-quality illumination, Lithonia Lighting is a market leader in indoor and outdoor commercial and architectural lighting. Our commitment to authenticity ensures your complete satisfaction on all luminaires including our innovative solid-state LED lighting systems.

## OUR PROMISE

*We have your back.* 

Provide lighting solutions that are enabled and enhanced by LED and other advanced technologies, including lighting controls.

Develop high-performance, reliable products using the highest-quality components rigorously tested in accordance with

industry-adopted standards. Stand behind our products with the best warranty service in the lighting industry.

Partner with Lithonia Lighting for solutions that use the latest developments in solid-state technology to deliver sustainable lighting.
